Student Campus Computing Committee
Meeting Notes
October 1, 2019
Education, Building 02, Room 024 at 12:10 – 1pm

Present: Camron Dennler, Chairperson
Abi Rahman - Davies, CLA
Steven Pineda, CSC
Matthew Wallace, CLA/CENG
Michael Brazil, OCOB
Alison Robinson, AVP for ITS
Kathryn Hammer, ITS

Absent: Carter Terranova, CAED
Nicole Hill, CENG
Kendal Grossgold, Kennedy Library
Matt Borda, CAFES
Brian Kagh, ASI Rep

I. Welcome back!
Caught up with summer events.

II. Unified Mobile App Status Update
Alison shared that ITS is working with the same vendor who worked on the new Cal Poly branding to brand the mobile app. A group of students was invited to test the mobile app in a test environment. The Registrar’s office is leading a governance group to oversee the content for the new app. With testing anticipated this month, the new app will become available at the end of October.

III. Learning Management System Update
This project is underway. The project team is working on getting courses and enrollments provisioned. During the transition this year, students might have courses in both the current LMS and the new system.

IV. Ideas for Recruiting 1st and 2nd Year Students to SC3
Many of the SC3 members will graduate this year. The committee brainstormed ideas for where to recruit 1st and 2nd year students:
- Resident Assistants, digital signage in campus housing
- Booth in the UU
- Talk to friends
- Advertise at the ITS Service Desk (QR code)
- Reach out to Department Chairs
- Reach out to Deans of Colleges
- Messages in newsletters sent to students
- Transfer Student Center
- Mentorship Programs
- Reach out to the Learning & Research Tech Workgroup for recommendations
V. Goals for 2019/2020 Academic Year

Several goals for the academic year were suggested:

- Focus on gaining input from students about new projects. Coordinate with student government to gather student input.
- Share information with the areas each member represents.

Dialogue continued about other changes on campus, such as the move to Eduroam. Alison shared some background. Timing of the change was important so as to not interrupt students mid-quarter. A new network was also introduced in campus housing, the CP-IoT. This network will be expanded to the rest of campus at a date yet to be determined. ITS is also looking at virtual computer labs and partnering with the Library on the effort.
